Level 1	Level 2	Level 3

Admin

The strings that appear in the back office and the content aimed at merchants.

Admin.Global

Any string that doesn't fit into a specific category but is still related to the back office and can be found on several pages (for example, "Enabled", or "Settings").

⚠️ If a string is specific to a given page, then it shouldn't be in the Admin.Global domain.

❎

Admin.Actions

All the call-to-actions, buttons, or links that appear in the back office, and that are quite generic (for example, "Save", "Add", or "Delete").

⚠️ If a string is specific to a given page, then it shouldn't be in the Admin.Actions domain.

❎

Admin.Notifications

All the warning, error, or success messages that appear in the back office. They must be general notifications applying to any part of the software (for example, "Settings updated").

⚠️ In case you have a specific notification (for example, "Are you sure you want to upgrade this module?", then it should fall under the notification subdomain for its functional domain, here Admin.Modules.Notification.)
